EXPERIENCE

Full Stack Development Training — Coders Academy, Mau

Oct 2025 – Present

Undergoing intensive full-stack development training covering React.js, ASP.NET Core, SQL Server, JWT authentication, and RESTful API design. Built and deployed multiple real-world projects during the training period.

PROJECTS

Student Management System | React.js · ASP.NET Core · SQL Server · JWT **2025**

- Built a full-stack student & library management system with role-based access control (Admin & Student).
- Tech Stack: React.js, Tailwind CSS (Frontend) | C#, ASP.NET Core Web API (Backend) | SQL Server (Database)
- Implemented JWT-based authentication with secure API access and token authorization.
- Modules: Students (Add/Edit/Delete/View), Books management, Book Allotment & Tracking.
- Designed RESTful APIs with Swagger documentation; integrated frontend with Axios.
- Automated student and book management — improved efficiency in tracking and allotting books.

Reminder App | React.jsx · Tailwind CSS · ASP.NET Core · SQL Server **2025**

- Developed a full-stack reminder application where users can select a date and receive automatic notifications when the reminder is due.
- Tech Stack: React.jsx, Tailwind CSS (Frontend) | C#, ASP.NET Core Web API (Backend) | SQL Server (Database).
- Features: Create, Edit, Delete reminders; automatic notification trigger on reminder date.
- No authentication — open-access utility application focused on clean UX and reliability.

- Built a live group expense management application — ideal for trips, events, or shared spending.
- Authentication: JWT Token + Firebase Google OAuth + Firebase Messaging for push notifications; full role-based access control.
- Core Features: Add/Delete transactions, per-member expense breakdown, real-time balance tracking.
- Analytics Dashboard: Transaction history, spending trends, group-level and per-person analytics.
- Groups Module: Create groups, add members, track who paid what and how much is owed.
- Scalable, secure, and production-deployed — demonstrates end-to-end full-stack capability.

TECHNICAL SKILLS

Languages	: JavaScript, C#, HTML, CSS, SQL
Frontend	: React.js, Tailwind CSS
Backend	: .NET Framework / .NET Core / ASP.NET Core Web API, Node.js
Database	: SQL Server, MySQL
Authentication	: JWT Token, Firebase Google Auth, Firebase Messaging
Developer Tools	: Postman, Swagger, Git, Github
Other	: Axios, RESTful API Design, Role-Based Access Control

PERSONAL DETAILS

Date of Birth	:	17 March 2003
Marital Status	:	Single
Languages Known	:	English, Hindi
Nationality	:	Indian

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief. I am confident in my ability to work effectively both independently and as part of a team.
